PROFILE

Originally from Rosario, but currently residing in Buenos Aires, I am a person in love with programming, looking for the opportunity to venture into the Software Industry.
I want to learn and to make a difference for the sake of the people that surround me. I want to land on a enterprise where I can challenge my knowledge, and keep growing as a young professional.
Responsible, enthusiastic, and always at hand are words that describe me, and Dennis Ritchie, Linus Torvalds and Guido Van Rossum are some of the personalities that inspire me.
